WORK EXPERIENCE

SupportYourApp

Apr 2024 – Present

Technical Support Consultant / SOC L1

Remote

- Provide technical support and incident resolution for an enterprise cybersecurity platform, handling complex cases involving email security, endpoint protection, VPN connectivity, and cloud application integrations.
- Investigate and remediate security alerts using a proprietary SIEM tool to analyze logs, correlate events, and identify root causes.
- Collaborate with Tier 2/3 engineering teams to escalate and resolve advanced technical issues.
- Manage and prioritize tickets through the full incident lifecycle from initial triage to resolution, maintaining clear and professional communication with customers and internal stakeholders.
- Document technical procedures, feature requests, and bug reports to improve product usability and support efficiency.
- Contribute to internal process improvements and customer satisfaction by providing clear, empathetic communication and actionable next steps.

Cyber security projects and training

Oct. 2017 – Present

- Studies:
 - Google Cyber Security professional certificate
 - Learn to program with Python 3 - Udemy
 - Analyze Network Traffic with TCPDump - Coursera
 - Vulnerability Scanning with Nmap: Network Scanning - Coursera
 - Wireshark for beginners: capture packets - Coursera
 - CompTIA Security + (expected September 2026.)
- Key projects:
 - Configuring a Microsoft Azure SIEM to capture data and filter it using a honeypot.
 - Utilized Tcpdump to capture and analyze TCP traffic.
 - Created a port scanner with Python.
 - Created a Python hash cracker with a dictionary.
 - Utilized Wireshark to analyze HTTP/S and RDP traffic.
 - Utilized Nmap to perform scans of a target and assess vulnerabilities.
 - Set up a home network utilizing Cisco Packet Tracer.
